1. AIM

To design a mobile application wireframe in Figma that supports multiple languages and localization features.

2. SOFTWARE USED

- Figma
- Web Browser

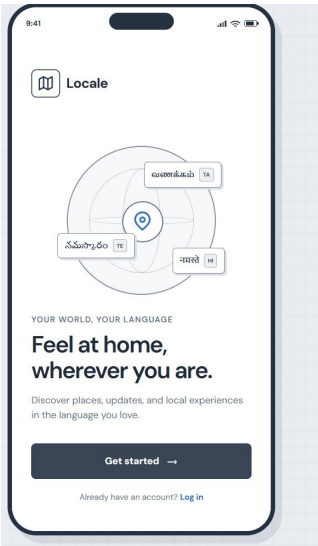

3. ALGORITHM

1. Open Figma and create a new design file.
2. Create a mobile screen frame.
3. Design Welcome, Login, Home and Settings screens.
4. Add language selection options (English, Tamil, Telugu and Hindi).
5. Include localized date, time and currency formats.
6. Connect screens using Prototype mode.
7. Preview and test the application navigation.

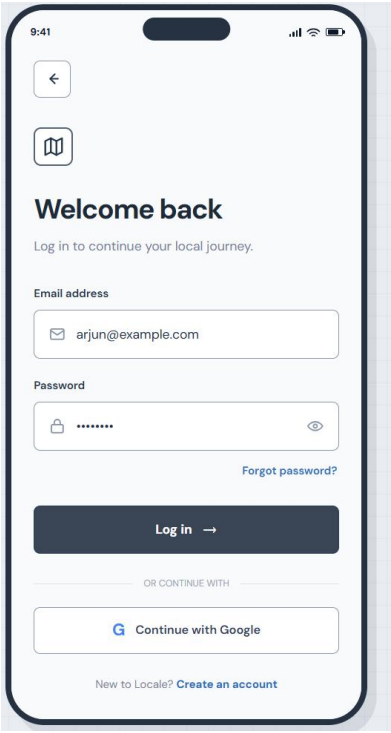

4. PROTOTYPE DESIGN

Create the following screens:

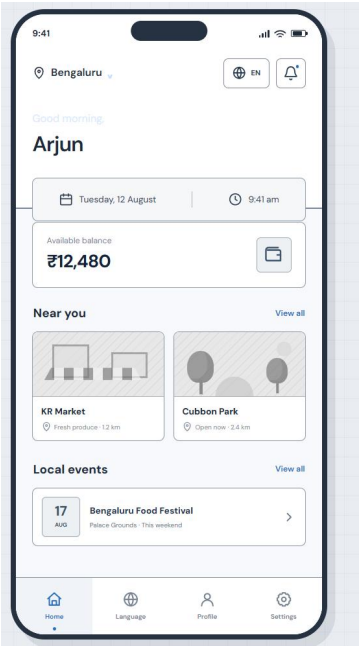

- Welcome Screen – App name and Get Started button.

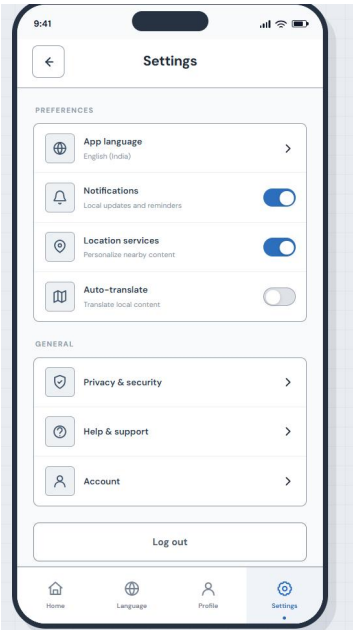

- Login Screen – Username and Password fields.

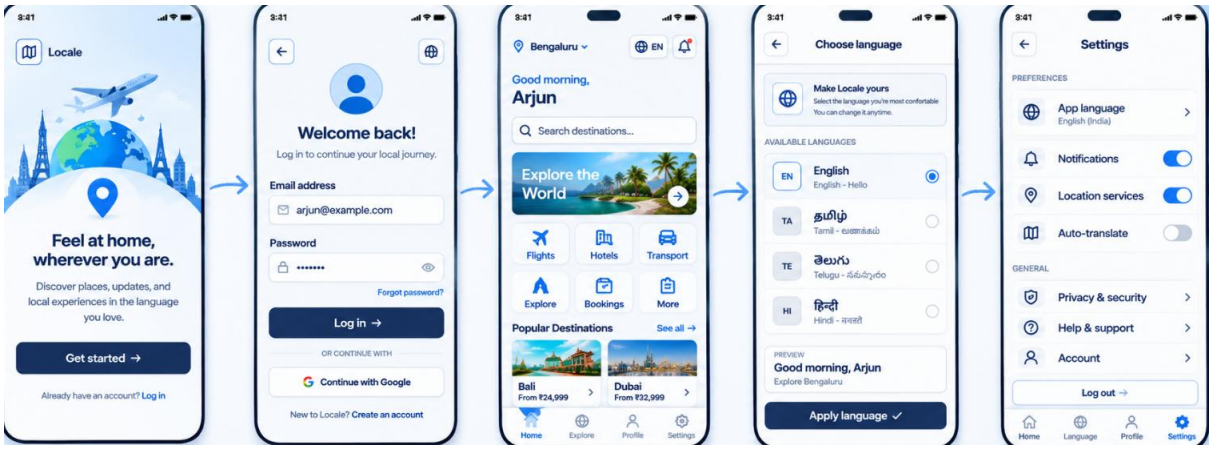

- Home Screen – Main menu and application features.

- Settings Screen – Language and location preferences.

DESIGN

5. RESULT

Thus, a mobile application wireframe with localization features was successfully designed using Figma, supporting multiple languages and user-friendly navigation.
