EXPERIMENT 2: Design a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

1. Aim

To design a user interface prototype for an e-commerce website using Figma, focusing on user convenience, easy navigation, product discovery, shopping cart management, and secure checkout.

2. Software Used

- Figma: For designing UI screens, wireframes, and interactive prototypes.
- Web browser: For accessing and previewing the prototype.
- Internet connection: For accessing Figma and testing prototype interactions.

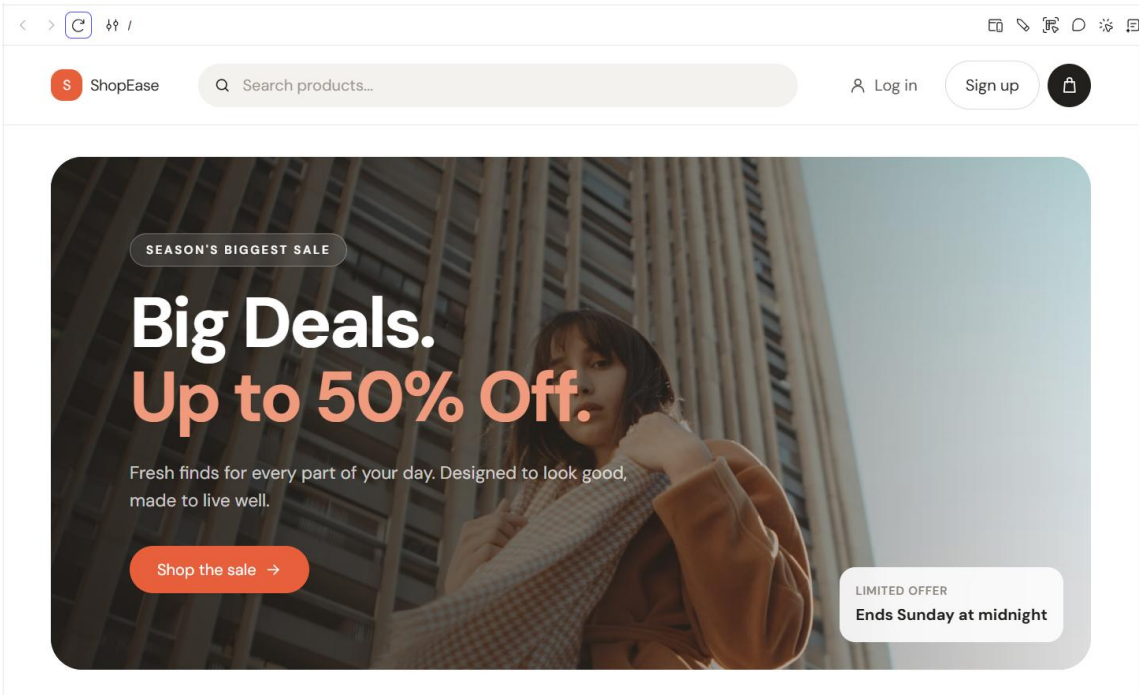

3. Algorithm

1. Start.
2. Identify the requirements of the e-commerce website.
3. Create a new design project in Figma.
4. Design the home page with a navigation bar, search bar, and promotional banner.
5. Design the product listing page with categories, prices, ratings, and filters.
6. Create the product details page with images, product description, price, and color selection.
7. Design the shopping cart page to display selected products, quantities, and order summary.
8. Create the checkout page with customer information, delivery address, and payment details.
9. Design the order confirmation page with order number and estimated delivery date.
10. Connect all screens using Figma Prototype mode.
11. Test navigation, buttons, and the complete shopping flow.
12. Save and preview the final prototype.

4. Design

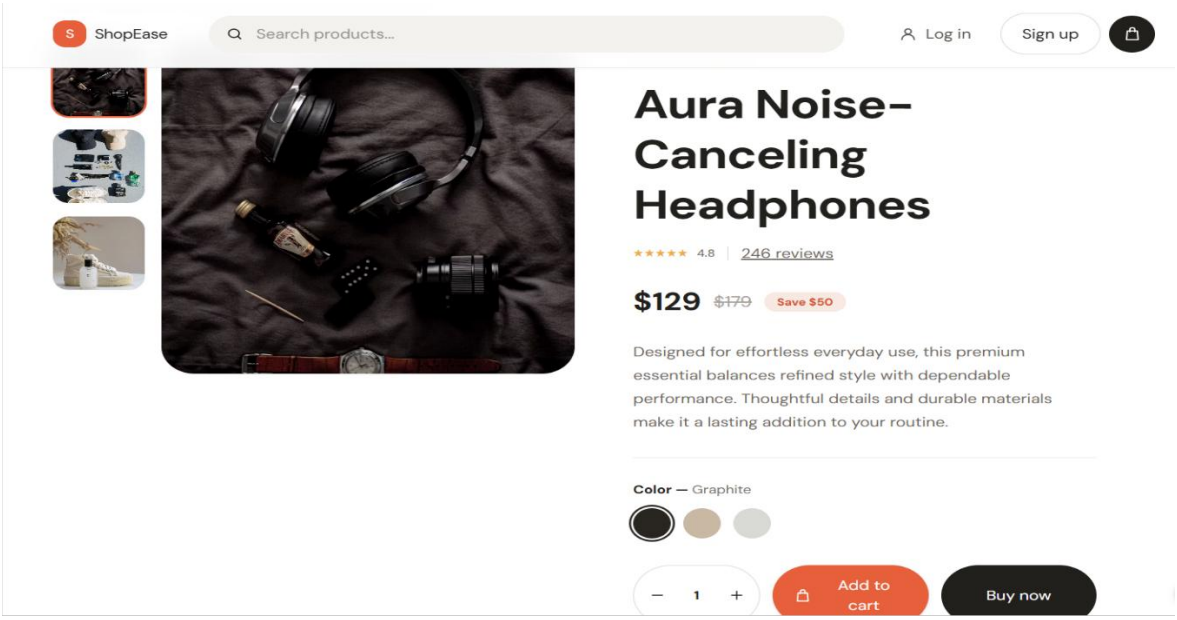

The e-commerce website, named ShopEase, consists of six main screens based on the provided reference images.

Screen 1: Home Page

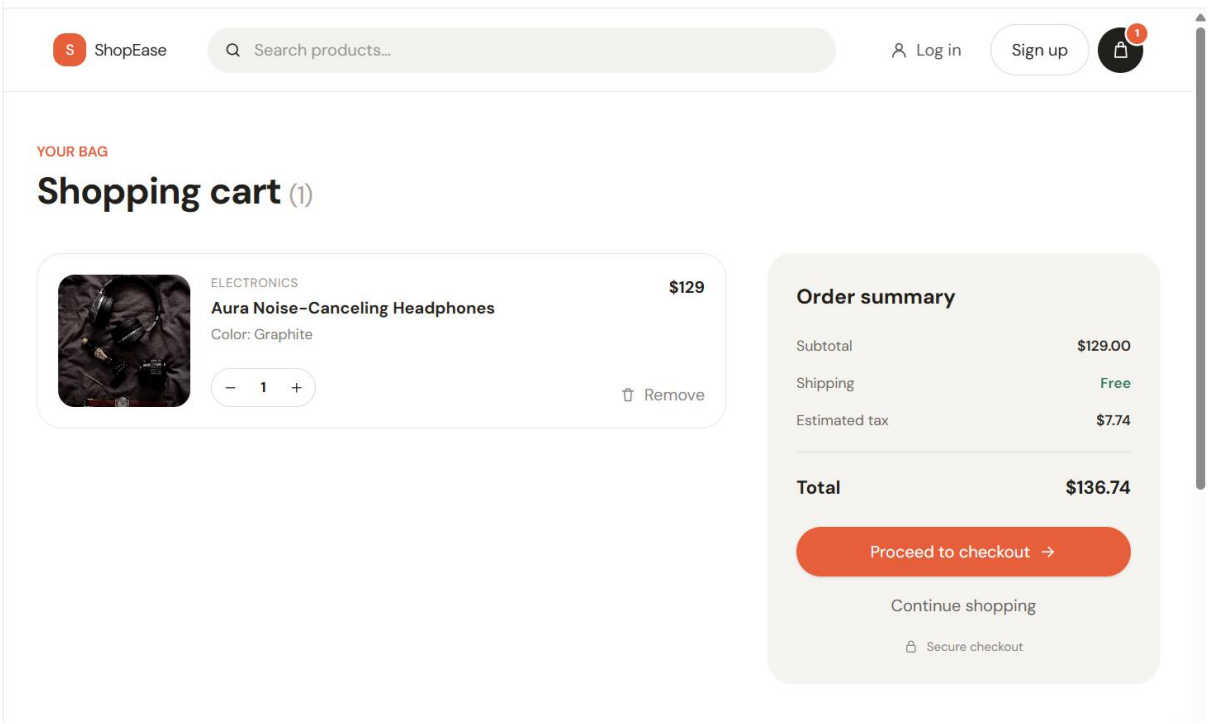

Screen 2: Product Details

Displays product images, product name, rating, reviews, price, discount, color options, quantity selector, and Add to Cart and Buy Now buttons.

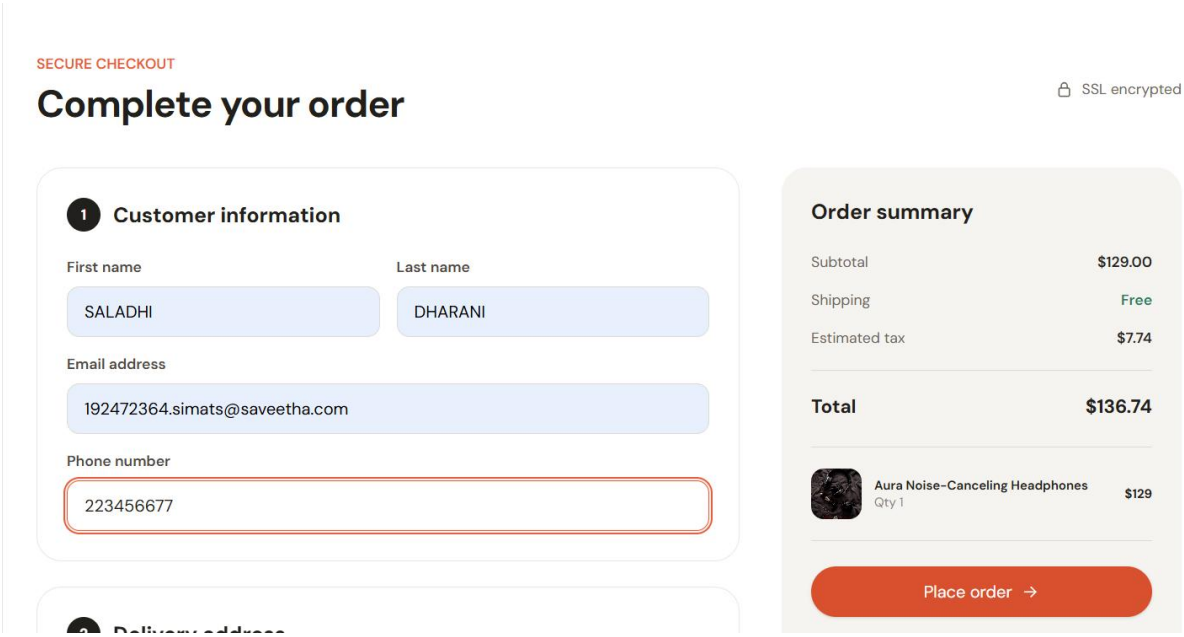

Screen 3: Shopping Cart

Shows selected products, product quantities, removal options, subtotal, shipping charges, estimated tax, and total price.

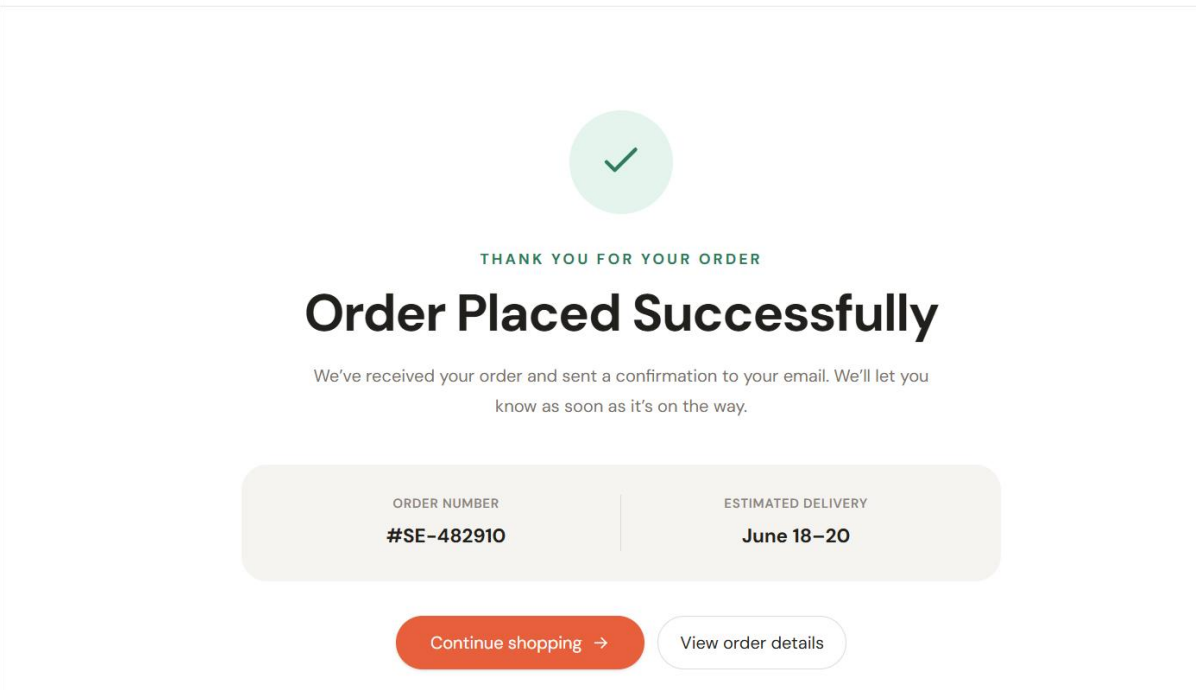

Screen 4: Checkout Page

Collects customer information, delivery address, and payment details while displaying the order summary.

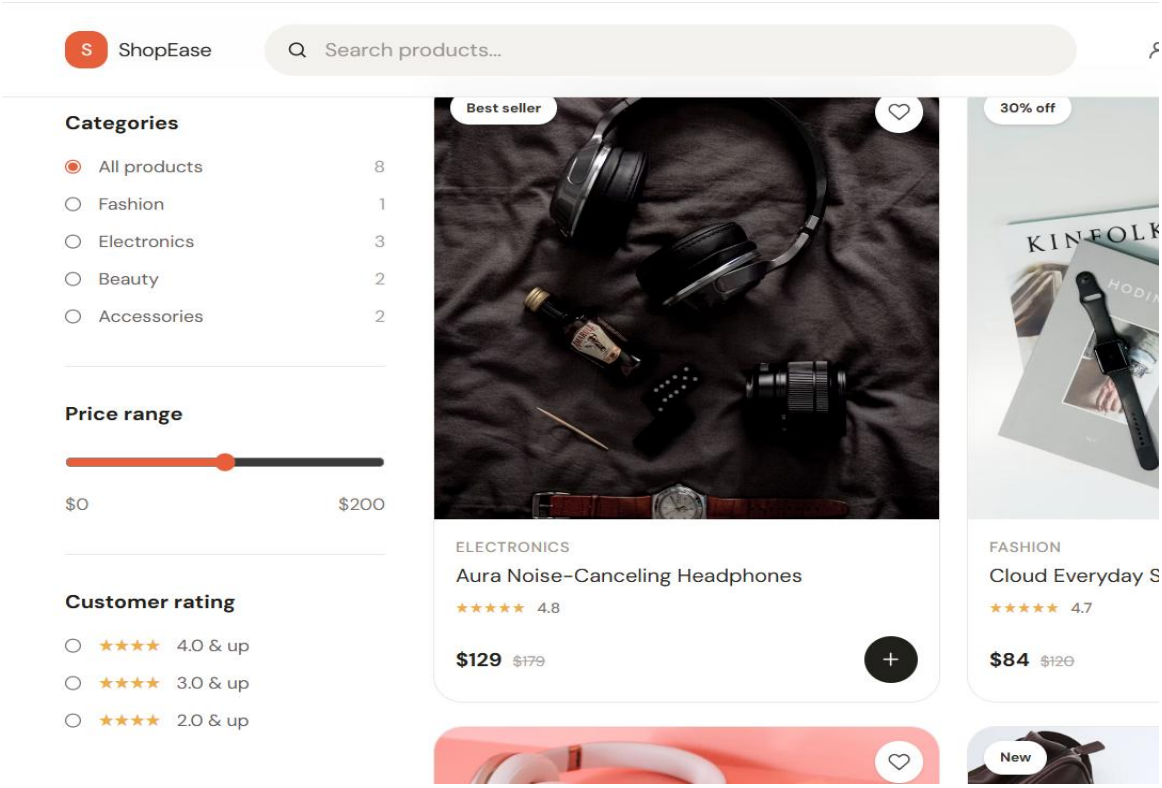

Screen 5: Order Confirmation

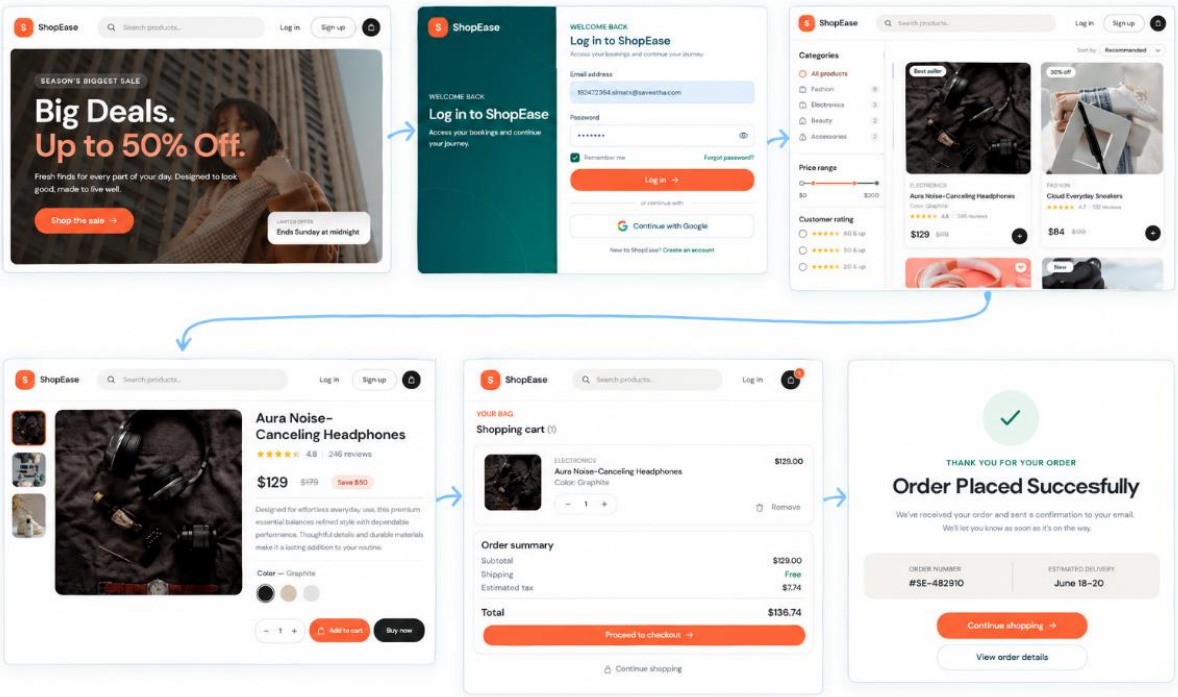

Displays a success message, order number, estimated delivery date, and options to continue shopping or view order details.

Screen 6: Product Listing

5. Prototype

6. Result

The user interface prototype for the ShopEase e-commerce website was designed using Figma. The prototype demonstrates the complete online shopping process, including home page navigation, product browsing, product selection, shopping cart management, checkout, and order confirmation. The design provides a simple, convenient, and user-friendly shopping experience.
